

# JUAN SEBASTIAN PARDO PARRA

Backend & DevOps Engineer | Multi-Tenant Systems | Java · Spring Boot · AWS

sebastianpardo0316@gmail.com • linkedin.com/in/juan-sebastian-pardo-parra • Bogotá, Colombia • Open to remote & relocation

## Summary

Backend engineer with 3+ years building and operating multi-tenant systems in Java and Spring Boot, currently Technical Lead of a school transportation platform serving 2,000+ recurring users across 5 schools and 100+ GPS-tracked vehicles. Owns both the backend architecture and the production infrastructure behind it: microservices and real-time services on AWS with Docker Swarm, and CI/CD pipelines that replaced a fully manual release process. Experience spans school transportation, education, access control and e-commerce, delivered in-house and as a freelancer handling projects end to end.

## Skills

**Backend** · Java 17 · Spring Boot 3 · Spring Data JPA · REST APIs · Microservices · WebSockets · JWT · NestJS · Node.js

**Infrastructure & DevOps** · Docker · Docker Swarm · Kubernetes · CI/CD · GitHub Actions · Portainer · AWS (EC2, RDS) · Nginx · Linux

**Databases** · PostgreSQL · MySQL · Firebase / Firestore · Multi-tenant schema design · Data migrations

**Architecture** · Multi-tenant systems · Software design patterns · System design · API design

**Integrations** · Google Maps API · GPS tracking · Geofencing · Modbus RTU · Firebase Cloud Messaging · Mobile deep links

**Also** · Next.js · React · Tailwind CSS · Automated testing · Code review · Agile / Scrum · Jira · Git

## Experience

### BO-TECH

Hybrid — Bogotá, Colombia

#### Technical Lead & Backend Developer

02/2025 - Present

Multi-tenant SaaS platform for school transportation and attendance control in Colombia — GPS tracking, access control, school management and parent-facing apps — serving 5 schools, 100+ tracked vehicles and 2,000+ recurring active users.

- Own the backend architecture and production infrastructure: ~15 repositories, 5–8 microservices plus real-time socket services, running on AWS EC2 with Docker Swarm.
- Replaced a fully manual release process — Docker images built on a developer's machine and deployed by hand with Compose, no tests, no CI — with GitHub Actions pipelines and Portainer webhooks, so deployments run from a push to a branch and regressions fail the pipeline instead of reaching production.
- Designed the multi-tenant data model across relational databases (PostgreSQL / MySQL on RDS) and Firestore, so schools share one platform without sharing data.
- Built the real-time layer: Google Maps tracking, geofencing and proximity events, per-stop ETA, and push notifications over FCM with per-user preferences.
- Integrated Modbus RTU odometers across the bus fleet to track vehicle work hours, extending the platform into hardware telemetry.
- Run nginx as reverse proxy and load balancer, with automated Let's Encrypt certificates, dynamic DNS inside Swarm and mobile deep links.
- Turn requirements from schools and non-technical stakeholders into technical design and executable tickets; lead the team through code review, mentoring and 15-day sprint planning in Jira.

BO-TECH

Backend Developer — Part-time

Remote — Bogotá, Colombia  
08/2023 - 01/2025

- Built backend features in Java 17 and Spring Boot 3 — REST APIs, JPA persistence and JWT authentication — within a microservices architecture deployed on AWS.
- Implemented the real-time vehicle tracking integration with Google Maps and the GPS device layer.
- Optimized queries, debugged production issues and tested changes to keep the application stable.
- Progressed from part-time contributor to Technical Lead within 18 months, taking on architecture and infrastructure ownership.

Páramo Programing

Backend & DevOps Engineer (Freelance)

Remote — Bogotá, Colombia  
01/2026 - Present

Independent software projects for external clients, covering scoping, architecture, development, deployment and ongoing operation.

- Delivered complete DevOps infrastructure for a client platform — Docker Swarm with Portainer and CI/CD pipelines — from an empty server to running production.
- Built an access-control MVP and a sports recommendation platform, covering both backend and frontend (Next.js, React, Tailwind CSS).
- Delivered a full-stack web platform for a motorcycling community, including e-commerce, events, member area and gallery.
- Scope and estimate projects directly with clients and handle technical communication throughout delivery.

Domo i — Innovation Center, Grupo Bolívar-Davivienda

Innovation Intern

On-site — Bogotá, Colombia  
07/2025 - 01/2026

Innovation center of Grupo Bolívar-Davivienda, one of the largest financial and business groups in Colombia. Held alongside the BO-TECH role.

- Applied research methodologies, design thinking and the SIT innovation method to explore new opportunities and develop user-centered solutions, working from the design hub alongside senior innovation and product profiles.
- Worked with multidisciplinary teams across the group to turn early concepts into testable prototypes.

Universidad de La Sabana

Data Analysis — PAT Program

On-site — Chía, Colombia  
02/2023 - 09/2023

- Selected for PAT, the university's program that places high-performing students in their first formal role.
- Collected, processed and visualized institutional data, producing Power BI analyses to support strategic decisions within the unit.

Key Achievements

🚀 Push-to-Deploy Pipeline

Replaced manual, machine-dependent releases with GitHub Actions and Portainer, adding CI and test coverage so regressions fail the pipeline instead of production.

● Real-Time Tracking at Scale

Built the live tracking layer now serving 2,000+ recurring users across 5 schools and 100+ GPS-tracked vehicles.

✔ Part-Time to Technical Lead

Took ownership of architecture and production infrastructure within 18 months of joining as a part-time developer.

Education, Certifications & Languages

Universidad de La Sabana

BEng, Computer Science

Chía, Colombia  
2021 - 2025

Oxford Test of English — B2

University of Oxford · 2026

Introduction to Packet Tracer

Cisco · 2022

Spanish · Native

English · Professional working proficiency (Oxford Test of English, B2)
